REPORT
OF
SUPERINTENDENT OF SCHOOLS,

For the Year ending March 1, 1881.

DISTRICT No. 1.

The Board of Education for this district, respectfully present the following annual report:

As in former years, we have had thirty-six weeks of schooling, in three terms of equal length, and in three grades, determined by scholarship.

Some of the larger scholars, whose attendance in the winter, has usually necessitated the employment of a fourth teacher during that term, having finished their education, we have been able, the past year, by a careful distribution of the scholars through the three grades, to dispense with this extra department without detriment to the school.

STATISTICAL SUMMARY.

PRIMARY DEPARTMENT.

TEACHER, MISS C. E. CUTLER.

	Wages per month, including board.	Scholars under five years of age.	Between 5 and 15 years of age.	Over fifteen years of age.	Whole number of Scholars.	Average attend- ance.	Number not absent during term.
Spring Term,.....	\$24	0	43	0	43	32	4
Fall Term,.....	28	1	47	0	48	35	9
Winter Term,.....	32	1	49	0	50	36	0

INTERMEDIATE DEPARTMENT.

TEACHER, MISS N. S. BROWN.

Spring Term,.....	\$32	0	33	1	34	28	3
Fall Term,.....	32	0	35	0	35	29	3
Winter Term,.....	36	0	37	3	40	33	2

HIGHER DEPARTMENT.

TEACHER, MR. WM. L. PIERCE.

Spring Term,.....	\$70	0	20	27	47	30	4
Fall Term,.....	70	0	17	24	41	34.4	5
Winter Term,.....	70	0	20	22	42	37.2	2

Miss Cutler succeeded Miss Benton in the primary department and has done good work. The committee have been gratified to observe a constant improvement in her methods of instruction and a growing interest in the school.

Miss Brown is on her second year in the intermediate department and has more than realized our expectations. She is the right person in the right place and all wish her to remain.

Mr. Pierce, who is at the head of the school, has had charge of the higher department but two terms, having followed Mr. Applegate, our former able principal, at the beginning of the fall session. He has proved a thorough, efficient and popular teacher and ought to be retained in the school.

Our whole community recognize how great a blessing our school has become and rejoice in its prosperity. But too many of our people seem to regard a school, as a kind of provision of nature, which comes and goes, like the seasons, without thought and without care. They love their children and wish them to succeed, but they manifest no interest and make no effort for

their education. They pay their taxes and then go to sleep and drift. Such people must be controlled by a profound moral indolence or a sublime trust in the philanthropy of their neighbors.

The committee desire to call attention to a chronic and obstinate malady of our system of public instruction. I refer to tardinesses and absenteeism. This irregularity of attendance, baffles the skill of committees and the labor of teachers, and exhausts the patience of both. More than any other one thing this detracts from the standing and utility of schools. It is a wrong done to tax-payers and to scholars who desire to learn and a drawback upon the intelligence of every community in which it prevails. If the district will give its co-operation and support to its board of education, we will extirpate the evil or the scholars who practice it from our school.

J. W. PATTERSON,	} <i>Board of</i>
W. C. DAWSON,	
S. W. COBB,	
	} <i>Education.</i>

In connection with the statistical report required by law to be made, I present a few general remarks instead of serving each teacher up in a separate dish, or in other words, reporting each separately, as has been the usual custom.

During the year quite a number of inexperienced teachers have necessarily been employed ; and while we should endeavor to encourage and assist them in every proper way, we should secure the services of as many first-class teachers as possible, those who have proved their efficiency in teaching, instead of such as have yet their mark to make, even at the sacrifice of a few weeks school.

As far as I am able to judge, our schools will compare favorably with those of last year, no serious trouble having occurred in any district, yet existing prejudice has acted against the interest of the school in a few instances, thereby depriving some of the benefit they should have received.

Of the twenty-seven different teachers employed, fourteen have taught in town several terms previous to this year, and their reputation is too well-known to require much comment.

Their success, almost without exception, has been all that I could expect.

Mr. Johnson and Mr. Brooks who have been employed in District No. 13, have never taught in town before, but have had experience elsewhere; evidently a good winter's work has been accomplished there.

Of the young teachers we believe there are those who will honorably fill the places of those retiring from the ranks.

The standard of our schools can only be advanced by securing the best teachers, not those who have merely the necessary intellectual qualifications, which includes a thorough knowledge of the elementary branches of education, but who make *thoroughness* in teaching one of the main points.

Pupils should not be allowed to pass from one principle to another till the first is perfectly understood. Teachers should also possess energy and self-reliance sufficient to impress their pupils with the idea that they have reserved force sufficient for any emergency. The *best* teachers need and should have the co-operation of parents, which can be manifested in many ways, especially by frequent visits to the school-room, with a view, not to criticise and find fault, but to encourage and assist if possible, by observing the method of instruction, then at home presenting the lesson of the day for review, with some practical suggestions, to secure a more thorough understanding; especially is this necessary when young and inexperienced teachers are employed who are naturally very sensitive, and need encouragement and an assurance that we are interested in their work, and ready to assist if possible. But few know the trials and difficulties the teacher has to encounter in the discharge of their duties, or the encouragement that a kind word fitly spoken may give.

OUR SCHOOL HOUSES.

Some of them are very much in need of repairs, while others should be replaced by new ones, more worthy the name of *school house*, and of which the citizens will not be ashamed. In looking over the State School Report, I find in one town, of ten houses, six are reported as unfit for use, in others a still greater proportion. Yet this should not deter us from making an effort for improvement in this direction.

THE SCHOOL REGISTERS.

In the manner they are filled out this year show an improvement over that of two years ago, but still they are not perfect. The more difficult questions are, in some cases, left unanswered, while the items to be obtained from the prudential committee are *very seldom* answered; these should not be omitted. Perhaps some of our committees have never examined the register, and are not aware that their report is required. It would be well for teachers to call their attention to the fact that their registers are not complete without it, and consequently they are not legally entitled to their pay. The necessity for this is that the town committee is required to report the same to the State Superintendent, and liable to a fine if he neglects to do so.

I have this year endeavored to complete the introduction of Harper's Geographies, where they were not previously supplied, obtaining them at exchange and introductory rates, which were refused us last year. In the exchange of readers made this year, I think we come nearer a uniformity through the town than ever before, as we have them at an even exchange for any other in actual use, and I found in several districts, old books of different kinds, they never having made the exchange for the Franklin Readers. I believe all have had an opportunity to make the exchange, and shall settle with the publishers within a few days, but can supply now if more are needed.

I would recommend that the names of pupils upon the "Roll of Honor" be included in the committee's report, thinking it may serve as an incentive to regular attendance and punctuality, which is very much to be desired.

The names as they appear this year are arranged in three classes, the first, which must necessarily be very small, including the names only of those who have been present every half day of three terms, without being tardy; the second class, the same for two terms; and the third, for one term, either of which is worthy of praise.

Thanking all for the cordiality with which I have invariably been received, and the many favors bestowed while in the discharge of my duties, I respectfully submit the foregoing remarks and statistical report.

L. W. ROGERS, *S. S. Committee.*
